

Dustcontrol QR Codes

User-friendly and effective, QR Codes ensure that the information you need is updated and never more than a quick click away.

Dustcontrol

QR Codes on Machines & Accessories

Easily scanned using a smartphone, QR codes work like quick links, taking you straight to the information you need. We aim to make it easy for you to find information about our products, such as how to replace and clean the filter, or replace the bag. Our QR codes make it easy to find helpful instructional videos in the language of your choice, including English, Swedish, German or Finnish.

DC 1800,
DC 2800, DC 2900

DC Tromb

DC 5800, DC 5900,
DC Storm, DC Tromb Turbo

THE HAZARDS ARE WHAT YOU CANNOT SEE

Some hazards are easy to detect, but there are others that you can't see at all. The smallest particles, which are invisible to you, penetrate the farthest into the lungs and stay there. Therefore, the best solution is to vacuum up both visible and invisible dust, right at the source. A clean working environment results in a healthier workplace, fewer stoppages, and higher product quality. Something we call Healthy Business.
