# DC Tromb 600 Twin LL

1-phase

**NEW! The DC Tromb 600 Twin LL model** is an industrial dust collector with a pre-separator mounted directly on the chassis. Filter cleaning is done manually. The dust collector is equipped with a fine filter and a HEPA filter. Both the dust collector and the pre-separator have plastic bags as a discharge option. DC Tromb 600 Twin LL is powered by three 1-phase fans. These can be controlled individually using buttons on the motor package.

**The DC Tromb 600 Line of Dust Extractors** are our most powerful single-phase dust collectors. They are designed to meet modern safety requirements and to work in conjunction with tools that have become ever more efficient and therefore produce more dust than they have previously.

The DC Tromb 600 is adapted for all types of fine dust such as concrete (silica), plaster, wood and filler dust. Perfect match for large floor grinders and large electric cut-off saws.

## Technical Data

| | |
|---|---|
| HxWxD [mm/in] | 1673x603x1041 /66x24x41 |
| Weight [kg/lb] | 79/174 |
| Collection container [l/gal] | L) Longopac |
| Flow max, fan, EU/US [m³/h/cfm] | 550/323 |
| Negative pressure, max, EU/US [kPa/inwg] | 19 +/- 10% |
| Power 230V /50Hz /60Hz [W] | 300 |
| Sound level [dB(A)] | 80 |

## Supplied with (Part No)

Connecting sleeve (2129)
Coupling socket (2008)
Suction hose antistatic (Ø50 mm /2") 5 m/16 ft (2013)
Floor nozzle B500 mm /W 19.7" (7238)
Suction pipe (Ø50 mm /2") (7265)
Fine filter, coated with PTFE (44017-3)
HEPA H13 filter, celloluse and fibreglass (44016-1)

## DC Tromb 600 Twin LL, Part No 182552

## Accessories to go with your DC Tromb 600 Twin Longopac

**44016-1 HEPA H 13 filter**
Made of celloluse and fibreglass

**44017-3 Fine filter**
Coated with PTFE (polyetraflouroethylene)

**432177 Longopac** plastic bags, 23 m /75 ft. Set of 4.

## New features!

- Easier filter change procedure.
- Tall cyclone & sturdy chassis.
- Quick coupling for filter change.
- Equipped with a HEPA H13

### Quick Response Code for more info!

Scan the QR code and get more information about the different DC Tromb models, videos, guidelines and much more.

### Equipped with the Highest filtration!

All our mobile machines are equipped with a fine filter and a HEPA filter (H13) that clean the exhaust air to 99.95 %. These high-efficiency filters also have a long service life, which not only results in cleaner air, but also low filter costs.

The filter systems comply with the OSHA regulation, Annex AA, H-class, EN 60335-2-69.
